## Consent for Services

As a condition of treatment by this office, financial arrangements must be made in advance. The practice depends upon reimbursement from patients for the costs occurred in their care. Financial responsibility on the part of each patient must be determined before treatment.

All emergency dental services, or any dental service performed without previous financial arrangements, must be paid for at the time services are performed unless other arrangements are made.

Patients with dental insurance understand that all dental services are charged directly to the patient and that he or she is personally responsible for payment of all dental services. This office will help prepare the patient's insurance forms or assist in making collections from insurance companies and will credit any collections to the patient's account. However, this dental office cannot render services on the assumption that our charges will be paid by the insurance company.

I understand that any fee estimate for this dental care can only be extended for a period of six months from the date of patient examination.

In consideration for the professional services rendered to me by this practice, I agree to pay the charges for the services at the time of treatment, or within (5) days of billing if credit is extended. I further agree that the charges for services shall be billed unless objected to, by me, in writing, within the time payment is due. I further agree that a waiver of any breach of any time or condition hereunder shall not constitute a waiver of any further term or condition and I further agree to pay all costs and reasonable attorney fees if suit be instituted hereunder.

I grant my permission to you or your assignee, to telephone me to discuss this statement or my treatment.

\_\_\_\_\_ I have read the above conditions of treatment and payment and agree to their consent.

Signature of patient, parent, or guardian (responsible party):

Signature: \_\_\_\_\_ Date: \_\_\_\_\_

## Privacy Consent – HIPPA Notice

Madison Dental Care is required by applicable federal and state law to maintain privacy of your protected health information. We are also required to provide our patients NOTICE about our privacy practices, legal duties and your rights concerning your protected health information. Madison Dental Care will follow the privacy procedures that are described in this Notice while it is in effect. Prior to commencing your treatment, you should review, sign and date this form.

Your protected health information (i.e., individually identifiable information such as names, dates, phone/fax numbers, e-mail addresses, home addresses, social security numbers, and demographic data) may be used in connection with your treatment, payment of your account, or health care operations.

You have the right to review our office's privacy notice prior to signing this CONSENT; a copy of this can be provided to you.

You have the right to request restrictions on the use of your health information; however, we are not required to, and may not, honor your request.

Madison Dental Care reserves the right to change our privacy practices and the terms of this Notice at any time, provided such changes are permitted by applicable law. Madison Dental Care reserves the right to make the changes in our privacy practices and the new terms of our Notice effective for all health information that we maintain, including health information we created or received before we made the changes. Before we make a significant change in our privacy practices, we will change this Notice and provide a new Notice at our practice location, and we will distribute it upon request.

You may revoke this consent at any time in writing; however, such revocation will not be effective to the extent that any action has been taken in reliance on this consent.

## American Dental Association Guidelines for Premedication for Dental Visits

For most people, dental treatments are routine and require no pretreatment planning. However, some people have certain medical conditions that require them to be medicated with antibiotics before dental treatment is performed. Certain dental procedures require taking an antibiotic to prevent an infection. Bacteria that are always present in the mouth may settle in another part of the body during or after a dental procedure. Those patients at risk are generally those that have had artificial joints, heart valve damage, or are otherwise medically compromised. For patients that meet these criteria, premed is required for any visit that requires us to do more than just visually look. If you have any questions regarding our premed policy or any other matter, please feel free to contact our office.

Preventative antibiotics prior to a dental procedure are advised for patients with:

- Recent heart surgery within past six months
- Cardiac transplant that develops a heart valve problem
- Pacemaker
- Within six months of vascular surgery (artery replacement)
- Artificial heart valve
- History of rheumatic fever
- History of infective endocarditis
- Systemic pulmonary stent
- Congenital heart defect
- Acquired valvular dysfunction
- A total joint replacement (premedication not necessary if you have received only pins, rods, mesh appliances)\*

\*The ADA guidelines are inconclusive regarding total joint replacement. It is our office policy to have our patients premed unless they obtain written permission from their MD stating premedication is not necessary.

Have you ever had any of the above listed procedures/conditions? If yes, which one? \_\_\_\_\_

When was it diagnosed? \_\_\_\_\_

Signature: \_\_\_\_\_ Date: \_\_\_\_\_

## Madison Dental Care Office Policies

- Madison Dental Care follows the American Dental Association protocol for x-rays. Bitewings are taken once every 1-2 years depending on health and caries(cavities) risk. Full Mouth x-rays are taken every 5 years.
- At every hygiene visit we will assess the health of your gums. If they do not fall within the ADA guidelines for a healthy mouth cleaning, a regular cleaning will not be done.
- Madison Dental Care requires every patient to have their blood pressure taken at every visit. We do this in our patient's best interest. We do not want to lay a patient back with their blood pressure elevated, putting the patient at risk for a stroke.
- We require our patients to confirm their appointments via text, email or phone. If it is not confirmed through email or text, we will make several attempts to call. After all attempts, if the appointment is not confirmed., we will take you off of the schedule.
- Patient is responsible for any balance that their insurance does not cover. The payment is due at the time of service.
- We do not file insurance for our Invisalign or Six-Month Smile patients. We will not have any correspondence with insurance companies regarding ortho if the patient chooses to file the claim on their own.

## Understanding and Consent to Dental Treatment

Please review the following consent form. You are required to sign prior to any treatment, however it does not commit you to treatment.

Teeth are traumatized in many ways. They are regularly traumatized by chewing, clenching and grinding. Teeth wear as we age. They may become shorter and weaker, develop cracks, fractures or actually be lost. The bacterial decay process that invades teeth also can significantly traumatize and weaken teeth. Any of these traumas can lead to the need to restore or replace a tooth or several teeth. A tooth may need treatment as little as a simple filling or a full coverage crown (cap). It may need to be replaced with a bridge or a dental implant. A tooth that has to be restored will have to be prepared (drilled), medicated, filled or covered. If a laboratory constructed crown is indicated a temporary crown will be constructed and cemented in place while the final crown is being fabricated. Upon return the final crown is evaluated for fit, bite, contours and aesthetics, then inserted with a strong cement.

Due to close proximity with the nerve, any and all of the above procedures can traumatize the pulp (nerve) of a tooth leading to intermittent sensitivity to hot, cold and/ or chewing. The pulp may become irreversibly inflamed thus needing root canal therapy to remove the injured nerve. A tooth becomes fragile after the pulp is removed and a crown is indicated to protect it from breaking. A simple filling may result in the need for root canal treatment, a crown build-up and a crown. Most teeth survive well, but some need more treatment than initially anticipated.

X-rays and visual examination do not tell us everything. There may be unexpected decay or breakdown under and around an old restoration or a crack in a tooth may go deeper than first anticipated. If any change to the initial treatment plan occurs we will inform you immediately and advise you of your options.

We prepare teeth as conservatively as possible to minimize trauma. They are medicated and restored only with ADA and FDA approved chemicals, materials and devices. Methods and techniques used have been successful in dentistry for many years. We blend the newest technologies with proven methods to best serve our patients.

Your health plays a major role in success of treatment. It is your responsibility to advise us of all the medications you are taking, any changes in your medications or if you are allergic to any medication. Please inform us of any health conditions or any change in your health. You must inform us of any adverse reaction to any treatment rendered by us or in any past dental or medical office.

If there is anything that you do not understand about your proposed treatment, any statement in this form or if you have any questions about this form or about what the doctors or staff have discussed with you, please write your questions below and we will be happy to discuss them. If you have no questions or comments write "None," then sign and date this form.

Thank you for allowing us to be your dental care providers.
